

EXCLUSIVE Unit Dose from AHP Enhances Pharmacy Efficiency

Hospital pharmacies juggle many critical tasks. The top priority is patient safety. Operational efficiency is important too as institutions seek to provide bar coded medications to enable BCMA in the most efficient and cost effective way possible. Our exclusive unit dose SKUs (*the only UD bar coded offering in the marketplace*) are an attractive offering to hospitals seeking reliably safe and easily scannable pre-packaged UD items.

Recently launched AHP exclusives include: **Fenofibrate 48 mg** and **145 mg tablets**, **Irbesartan 150 mg tablets**, **Naltrexone HCl 50 mg tablets** and **Sildenafil Citrate 20 mg tablets**.

Easy-to-read bar codes ensure both accurate and easy scanning. In addition, our cartons feature color-coded labels with "tall man" lettering to more easily distinguish between similar items on the pharmacy shelf.
