

Fagron Advanced Derma

Leading advanced dermatological care

Fagron successfully created a revolutionary concept for advanced, individualized dermatological therapy and care: Fagron Advanced Derma. Fagron Advanced Derma offers unique benefits based on the latest scientific knowledge in pharmaceutical compounding for dermatology.

With Fagron Advanced Derma, patients receive a total solution for both tailor-made prescription compounding and basic skin care:

- Vehicle design based on the latest insights concerning tolerance of ingredients used in dermatology
- Often used in patients with vulnerable and sensitive skin types, formulated with ingredients that most skin groups tolerate.
- A compatibility table is available, designed to help you search for compatible vehicle and APIs/dermaceutical ingredients (DCIs) combinations.
- Different bases for different skin types
- Example formulations available for help with prescribing and compounding

Contact Fagron now to discover Fagron Advanced Derma's total solution.
