

Fagron SyrSpend® SF

Superior Suspending Technology

Fagron's SyrSpend® SF is a total solution that provides you with a convenient and efficient oral liquid dosage form. It uses patented Active Suspending Technology holding APIs in suspension longer for more accurate and consistent dosing. Formulated with meticulous attention to detail, SyrSpend® SF is frequently used for pediatric as well as geriatric patients.

SyrSpend® SF Vehicles

- Extensive and growing database of scientific references for stability data and beyond-use dating
- Pre-weighed convenience packs available to compound suspensions in minutes
- Supports adjusted and flexible dosage regimens

SyrSpend® SF

- All-in-one syrup suspending vehicle
- Simple one-step compounding process
- pH adjusted to 4.2 for maximum compatibility
- Also available as powder for reconstitution (preservative-free)

SyrSpend® SF Alka

- Easy-to-use suspending powder for reconstitution
- Provides an alkaline (>7) environment for acid-labile drugs
- Preservative-free

Active Suspending Technology

- Holds particles in suspension longer
- Allows more accurate dosing

Low Osmolality

- <50 mOsm/kg
- Minimizes GI upset and diarrhea
- No sorbitol means lower osmolality to lessen laxative/diarrhea problems
- Ideal for pediatric and geriatric patients

Sweetened without Sugar or Alcohol

- Bitterness is masked
- Pleasant taste enhances compliance
