

Omeprazole + SyrSpend® SF Cherry Alka Kit

Fagron's all-in-one omeprazole suspension compounding kit – It is that easy!

The challenge¹

Emma (2 years old) is frequently spitting up and crying after feeding. Her parents notice weight loss. After consultation with her pediatrician, Emma is diagnosed with gastroesophageal reflux disease (GERD). Emma's pediatrician wants to treat her with an omeprazole suspension, customized to Emma's needs. Commercially manufactured preparations are not readily available.

Fagron's innovative compounding solution

A simple process of adding the pre-weighed omeprazole and 100 mL of water to the bottle of SyrSpend® SF Alka powder enables the pharmacist to prepare a stable² and pleasant-tasting omeprazole suspension in just minutes for Emma. The Fagron Omeprazole + SyrSpend® SF Alka kit provides the tools needed to compound this cherry flavored suspension.

With focus on patient, prescriber and pharmacist, Fagron offers unique solutions that add significant value in the individualized treatment of patients with specific needs. Fagron's all-in-one kit offers the pharmacist a convenient and time-saving solution to help patients like Emma.
