

# Don't give drugs away

## How do you know if

- you are incorrectly coding drugs?
- you have charge capture issues?
- newly-purchased drugs are missing from the formulary or chargemaster?
- you are using incorrect multipliers?
- you have inappropriate NDCs captured on claims?

You're controlling costs but cost is only part of the challenge. The future is about value. Your pharmacy and your revenue cycle are now part of a larger value cycle, and your goal is to achieve the best outcome for the best cost.

Pharmacy ChargeLink® automatically audits drug purchase history, formulary, chargemaster and up-to-date regulatory reference, helping you address the revenue gaps that sabotage efforts at cost reduction. Learn more about our range of value cycle solutions at [craneware.com](http://craneware.com) and [thevaluecycle.com](http://thevaluecycle.com).

*The value cycle:  
quality patient outcomes and  
optimal financial performance*
