“

What makes our business very unique is the niche service that we offer through the RxASP 20. We can now offer our patients the option of picking up all their prescriptions once a month, organized, so they can easily take them as prescribed, and get them on track to achieve 100% adherence. This really helps our business, but it also helps our patients achieve their health goals. When we prove our patients are adherent we maximize our reimbursements and gain a competitive advantage in the increasingly outcomes-based healthcare environment.

Love Oak Pharmacy, Benjamin McNabb, Owner
