

Efficient and effective.

## Tight on space?

### Stacking kits are the perfect solution

The CDC encourages the use of stand alone pharmaceutical-grade refrigerators and freezers, but this is often a challenge for areas tight on space. Helmer Scientific provides the perfect solution with the undercounter stacking kit.

- » Save space in your pharmacy, medication room, or clinic
- » Meet CDC guidelines for stand alone refrigerators and freezers
- » Customize storage: stack 2 refrigerators, 2 freezers, or 1 refrigerator and 1 freezer
- » Separate private and VFC stock

This set up saves space like a combination unit, while providing the quality and reliability of true medical-grade cold storage.
