

# Fagron SyrSpend® SF

## Superior Suspending Technology

Compounding pharmacists need to have quality stability and BUD data to support their efforts creating customized medications. Over 70 APIs with SyrSpend® SF products have been studied and published in reputable peer review journals, including IJPC. Five of the top 10 drugs administered to 38 million beneficiaries enrolled in Medicare Part D have stability and BUD supporting data.<sup>1</sup> To learn more about the APIs studied with SyrSpend® SF products, visit [us.fagron.com/en-us/syrspend](http://us.fagron.com/en-us/syrspend).

### SyrSpend® SF Vehicles

- Extensive and growing database of scientific references for stability data and beyond-use dating
- Pre-weighed convenience packs available to compound suspensions in minutes
- Supports adjusted and flexible dosage regimens

### SyrSpend® SF

- All-in-one syrup suspending vehicle
- Simple one-step compounding process
- pH adjusted to 4.2 for maximum compatibility
- Also available as powder for reconstitution (preservative-free)

### SyrSpend® SF Alka

- Easy-to-use suspending powder for reconstitution
- Provides an alkaline (>7) environment for acid-labile drugs
- Preservative-free

### Active Suspending Technology

- Holds particles in suspension longer
- Allows more accurate dosing

### Low Osmolality

- <50 mOsm/kg
- Minimizes GI upset and diarrhea
- No sorbitol means lower osmolality to lessen laxative/diarrhea problems
- Ideal for pediatric and geriatric patients

### Sweetened without Sugar or Alcohol

- Bitterness is masked
- Pleasant taste enhances compliance
