Smart system.
Smart refrigeration.

MinibarRx[®], the SMART refrigeration system designed specifically for vaccines storage, handling and inventory management for healthcare providers so you have more time to focus on patient care.

Schedule an appointment to learn more about our unique capabilities:

- **Forward-Deployed Inventory (FDI) Program:** No risk to you for expired product inventory. Reduce your inventory investment by only paying for vaccines you use.
- **Intelligent PAR Management:** Aligns with your current vaccine portfolio. Customize your system configuration based on your current vaccine menu and inventory replenishment based on historical usage.
- **and much more!**
