

Fagron Hospital Solutions

Fagron provides time-saving options for compounding in a hospital setting.

Fagron offers solutions that add significant value in the treatment of patients with unique needs. With a global focus on innovation, we are driven to continuously provide pharmacists with the best time-saving solutions in compounding.

SyrSpend® SF Vehicles

Fagron's SyrSpend® SF is a total solution that provides you with a convenient and efficient oral liquid dosage form. The unique starch-based suspending vehicle uses patented Active Suspending

Technology to assist in keeping the active pharmaceutical ingredients (APIs) in suspension longer, allowing for more accurate and consistent dosing for the duration of treatment. Formulated with meticulous attention to detail, without alcohol, parabens, sugars, gluten or dyes, SyrSpend® SF frequently is used for pediatrics and geriatrics.

LETS Kit™ Convenience Pack

LETS is a solution of lidocaine, epinephrine, tetracaine, and sodium metabisulfite and is an economical and

proven option to provide rapid topical anesthesia. LETS is effective in providing and maintaining anesthesia, free of controlled substances, easy to use, and reduces the risk of adverse reactions. LETS provides a cost-effective, simple package that contains all ingredients, and is easy to compound by the simple addition of water.
