Company Background

DOSIS® products by Manchac Technologies are designed to enhance efficiencies in your pharmacy. Our initial product, the DOSIS L60 is the leading provider in LTC blister card automation. With deployments in 37 different states across the United States, including Hawaii. DOSIS L60 is the corner stone of single medication 28, 30, or 31-day blister card robotic solution. The DOSIS L60 is the only compact affordable robot that fills, seals and patient labels blister cards.

Led by Randall Murphy and Monroe Milton, Manchac was founded by veteran pharmacy automation engineers. Our assembled team has significant experience in the design, development, manufacture, service, and support of pharmacy automation products. With well over 100 years of collective industry experience, Manchac will continue to leverage the team's talents and skills to dominate an ever-growing pharmacy market serving Long Term Care and Assisted Living Facilities; and, later expand into other automation markets.

Product Overview

DOSIS® L60 is a robotic solution for completely automating prescription filling, sealing, and patient labeling of 28, 30, or 31-day single medication blister cards (a.k.a. bingo-cards) in a physically compact enclosure. The L60 has the capability of filling a day supply into the card in any order. With regulations changing doing a 14-day fill for just name brand is effortless!

This solution offers unbounded value to pharmacies in need of higher prescription throughput without extra staffing. The L60 operates hands-free which allows your pharmacy staff to continue their work while DOSIS produces prescription labeled blister cards. DOSIS is the most cost effective fully automated prescription packaging of blister cards in the market.

Blister cards, which typically hold a single medication 30-day supply, are preferred for use in Long Term Care facilities due to their ease of handling, inspecting, and administering to patients. Compliance starts with medication time pass labels, which provide ease of medication administration. It is also one of the cheapest ways for pharmacies to deliver medication in dose form.

DOSIS has the capacity to run continuously for up to eight hours unattended before restocking empty blisters. To minimize impact to pharmacy floor plans, the unit is similar in size and shape to a vending machine or shallow refrigerator (26" L x 42" W x 78" H). An L60 can hold 60 unique medication canisters at a time, which allows for adding extra canisters in rotation based on your medication formulary needs. Each DOSIS canister, has a capacity of 1000cc. DOSIS is typically installed and operational in a single day, and makes an impact to the pharmacy's card production in the first week.

■ Flexibility

DOSIS improves your pharmacy's flexibility to meet the needs of your customers. You can set dispensing parameters based on payer type, facility, or prescription. Being able to use the same automation for a variety of customers, you can now grow your business without the fear of outgrowing your automation.

- No dedicated staffing need for DOSIS, it is simple to operate.
- Typically only 45 minutes to one hour of touch time per 8 hour shift to keep DOSIS producing.
- Keep up with an increase in your prescription volume demand.
- Eliminate overtime for filling cards.
- DOSIS works while you are not with its ability to work after normal business hours.
- Stop pre-packing cards, DOSIS does on-demand!
- Allows for a remote on-call pharmacist to fulfill a prescription remotely, such that a prescription is ready upon their arrival.
- DOSIS is being utilized in pharmacies serving 300 beds and up.
- DOSIS offers scalability at an affordable price-point.

■ Additional Products

- DOSIS cTRAQ removes the guesswork from sorting all prescriptions: Get the right script to the right facility every time. cTRAQ monitors completed work versus work-in-process, highlighting work to be completed.
- DOSIS mPAQ Printing takes over label printing allowing optimal workflow: Reducing waste and time spent chasing labels. Adjust label content for med-pass labels, auxiliary warnings, or formatting based on facility and medication type.
- DOSIS Consulting allows you to leverage our vast experience of pharmacy knowledge: Observe, analyze, and propose solid effective solutions.

Manchac Technologies is committed to providing solutions with positive impacts to your operations!
