EXCEED YOUR VISION

## Company Background

Epson is a global innovation leader whose product lineup includes a broad range of printing and digital imaging technologies for transaction-based industries and applications. For over 40 years, Epson's advanced technology has been at work in millions of point-of-service systems, banks and healthcare organizations around the world. Epson solutions are designed to reduce operating costs, simplify training, speed transactions and improve patient safety. From pharmacy compounding labels and medical imaging to admissions and RDC payment applications, we've leveraged our expertise in printing and imaging to deliver the value added printing and imaging solutions our customers need. Epson is a committed supplier/partner for healthcare solutions.

## Product Overview

Now pharmacy compounders have a fast, reliable way to produce color-enhanced labels with Epson's SecurColor inkjet printer. Unlike current cumbersome label printing solutions that use pre-printed labels or blank label sheets, SecurColor's on-demand color printer allows you to print a wide range of labels on blank stock, avoiding pre-print costs. And because system software can associate proper warnings, the risk of human error is greatly reduced.

Color can enhance processes to add clarity to medication dispensing and administration operations by helping prevent drug mix-ups and patients, dosing errors and legibility problems. With SecurColor, you can generate labels systematically from popular software applications, increasing pharmacy labeling efficiency and accuracy with updated warnings, critical alerts and instructions. Because you can print one color label at a time or many labels as needed, pharmacies gain all the benefits of color with the flexibility to support changing medication labeling requirements and volume. SecurColor prints vibrant, smudge-proof text and graphics with qualified label media from 1.2" to 4.4" wide. The SecurColor printer has been approved for USP <797> clean room environments.

## Additional Product Lines

For pharmacies with multiple printing and scanning needs, Epson also offers receipt printers, document scanners, mobile printers, check and ID scanners and full-page color printers for information and instructions.

## Features & Options

- Custom on-demand printing of color-enhanced pharmacy compounding labels
- Proven Epson inkjet technology and quality
- Automatic Nozzle Checking technology ensures color accuracy at all times
- High-speed printing up to 3.7" per second
- Easily adjustable to handle 1.2" to 4.4" widths
- Supports leading barcode fonts
- Easy user access with front loading labels and ink cartridges
- Small footprint fits easily on desk or shelf
- Connects to existing information systems with USB 2.0 and Ethernet interfaces
- Controlled through an easy-to-use Windows driver

## Product Specifications

### ■ Epson SecurColor – Selected Printer Specifications

- Epson MicroPiezo® inkjet printer technology; 3 colors with pigment ink
- Print resolution of up to 720 dpi x 360 dpi
- Interface options: USB 2.0, Ethernet
- Prints text, barcodes and images
- Print speeds up to 3.7 inches/second
- Media handling capabilities for roll-fed or fanfold, die cut or continuous (plain paper or adhesive on liner)
- Media guide: Continuous (stepless) adjustment with no tool up to 4.4"
- Media sensors: "Gap" and "Black mark sensor"; "Paper end" sensor
- Auto cutter: Standard, reliability up to 1.5 million cuts
- Overall dimensions 10.0 x 1.6 x 10.0" (W x D x H)

## Key Business Partners

**Product Resellers:** Baxa, Bio-Optronics, Digi-Trax Corporation, General Data, Identocard Systems, NEPS, McKesson Pharmacy Systems

**Media Partners:** Fasson Roll/Avery Dennison, General Data Corporation, Glatfelter Paper, Neenah Paper Inc., Precision Dynamics/Timedmed, Shamrock Scientific Specialty Systems, Inc., Wausau Coated Products, WS Packaging Group, Inc.

**Software Partners:** Niceware International, Seagull Scientific, Teklynx International
