Company Background

Fagron, Inc., a Fagron global company, is a leading developer and supplier of innovative delivery vehicles (creams, syrups, and lotions), bulk pharmaceutical ingredients, excipients, and high-quality compounding equipment. Fagron, Inc., is a VAWD accredited, FDA and DEA-registered pharmaceutical manufacturer that strictly adheres to current Good Manufacturing Practices (cGMP). We conduct an extensive vendor validation program, including on-site manufacturer audits to verify product quality. During vendor qualification, full monograph analysis is completed to verify the strength, purity, and quality of sourced active pharmaceutical ingredients (APIs). Fagron, Inc. only sources APIs from FDA registered suppliers.

You can always be confident you are receiving the highest-quality and fully tested compounding essentials with Fagron's three point quality assurance. Each ingredient lot undergoes robust vendor qualification and rigorous testing of raw material and finished goods prior to customers receiving product. In addition to Fagron's quality promise, we offer a wide range of educational offerings through Fagron Academy and provide excellent technical support services.

Product Overview

■ SyrSpend® SF Family of Oral Suspending Vehicles

SyrSpend® SF is a trusted, innovative oral suspending vehicle for the compounding of oral liquid dosage forms with over 96 stability studies¹. Based on food starch, SyrSpend® SF's superior suspending properties provide consistent, individual dosing throughout treatment. The effortless compatibility with a broad range of active pharmaceutical ingredients (APIs) and meticulous ingredients make SyrSpend® SF highly suitable for compounding stable tailor-made medication. SyrSpend® SF is a quick and easy compounding option that provides pharmaceutical stability and dosage consistency with each preparation. Its light texture, non-toxic ingredients, and neutral taste result in treatment that is comfortable and easy-to-swallow for all patient groups, from neonates to elderly. Compatible with an extensive range of APIs, you can

choose the most suitable product for compounding from both acid and alkaline options.

UniSpend Anhydrous, a line extension to the SyrSpend family, is also available as an elegant easy-to-use, plant-based vehicle for water-unstable actives.

■ LETS GEL KIT™ Convenience Pack

Fagron's industry leading LETS GEL KIT™, a rapid topical anesthesia convenience pack, features SuturaGel™ Methylcellulose base, a specially formulated gel to minimize medication run-off. Pharmacists now can reliably prepare up to 33 unit-doses with 90-day beyond-use-dating (BUD) when stored in Fagron 3 mL unit-dose syringes.¹ Included in this easy-to-use convenience pack are pre-weighed active ingredients: Lidocaine Hydrochloride, Epinephrine Bitartrate, Tetracaine Hydrochloride, Sodium Metabisulfite, topical syringes, and SuturaGel™.

■ FagronLab™

Introducing a growing line of high-value pharmacy solutions:

- Maximum Performance Mixing Machines and Accessories
- Reliable and Sophisticated Hotplate Stirrers
- Easy and Precise Liquid Dispensers
- Professional Laboratory Robot Vacuum
- Time Saving Capsule Filling Systems

FagronLab™ is the first global product line of compounding equipment. FagronLab™ is specially designed for the needs of modern compounding pharmacies. The operation and design of the equipment offers high-level accuracy and ease-of-use, thus helping ensure repeatability for everyday compounding through a wide range of customized features. FagronLab™ offers accurate, safe, and quality solutions for patients through excellence in compounding preparation in pharmacies.

■ Drug Shortages Solutions

Fagron carries a wide range of APIs to help you get through drug shortages. Our high-quality APIs can be used to compound capsules, oral solutions, topical preparations, and parenteral preparations (USP <797>). Before switching your patients to alternative therapies, Fagron is your go-to source when it comes to drug shortages.
