## Company Background

Liberty Software is an independent software company serving retail pharmacies across America. We have been successful at developing technology that helps community pharmacies compete in today's marketplace.

At Liberty Software we work hard to make sure our clients are satisfied and happy. To do this, we have brought together a team of individuals who are experienced with pharmacy and technology, and just as important, are friendly and helpful.

## Product Overview

Here at Liberty, we believe that RXQ is a next-generation pharmacy management system. Why do we say that? It's not just the technology, although RXQ is built on Microsoft's newest technology platform. It's not just the feature list, although it is comprehensive. More than anything, we believe that it is the user experience. Prescriptions can be filled quickly and accurately. Many pharmacists have told us it is the easiest system they have ever used.

Pharmacies processing a large number of prescriptions daily, face numerous challenges. Many pharmacies are still using antiquated systems that do not have the ability or features to handle their prescription volume. RXQ is stable and scalable as you grow. We have the features to ensure that you are productive and profitable. If there is a problem, we have a support team that understands the needs of high-volume stores.

How long does it take to teach new employees how to operate your existing pharmacy software? Pharmacies using RXQ have found that new employees can often begin filling scripts immediately, with little to no training. It's just that simple. A well-designed pharmacy system should make your employees more productive and happier. When you do need help, it's only a phone call or mouse click away.

## Features & Options

### ■ Benefits

- Organize Your Pharmacy
- Fill More Scripts Without Adding Staff
- Improve Customer Service
- Streamline Your Workflow
- Manage and Improve Profits
- Increase Patient Safety

### ■ RXQ Features

- **Prescription Processing** - Fast and simple prescription filling.
- **Insurance Adjudication** - RXQ gives you the tools to help cope with third-party claims.
- **Work Flow** - Fully integrated into RXQ allows fast refilling, e-prescribing, tech and pharmacists verifications, doctor call list, deliveries, bins, owes, and customizable tasks.
- **BZQ Point-of-Sale** - Enables you to track sales, front-end inventory, signature capture, process credit, debit, and FSA cards.
- **Integrated Facts & Comparisons**
- **Document Management**
- **iPad Drive-thru & Delivery App** - Capture electronic signatures on your iOS device.
- **Inventory Control** - Monitor stock levels, generate purchase orders, and keep costs under control. You can review drug usage to help make stock decisions.
- **Accounts Receivable** - Prescriptions can be auto-charged directly from the prescription screen or through our integrated point-of-sale lane.
- **Extensive Reporting** - RXQ's Data View and user customizable reporting gives you the information you need, when you need it.

## Testimonials

*"RXQ is easy to learn, has lots of great user options and the support is phenomenal!"*

— Brian Erickson, Freedom Pharmacy

*"I have been with Liberty for a number of years and they have kept up with our industry. I would recommend them to any independent."*

— Scott Palmer, A&P Pharmacy

*"We really enjoy the point-of-sale system. It has given us absolute accountability. The delivery features and signature capture has really made life easier for us."*

— Bill Mattson, Ballin Pharmacy

## Additional Product Modules

### ■ BZQ Point-of-Sale

For your pharmacy, point-of-sale software needs to be more than cash drawer management for your front end. For your patients, it should enable your staff to provide better service. For you, it should result in better accountability, assistance with HIPAA compliance and improved pharmacy management. These are values that not just any point-of-sale package can deliver. That's why we developed the BZQ pharmacy point-of-sale software from the ground up, designed especially for community pharmacies' needs. BZQ is not simply an add-on to your pharmacy system, but a completely integrated solution that works hand-in-hand with the RXQ pharmacy system.
