Company Background

Talyst is a market leader in pharmacy automation and your partner in pharmacy operations. Our solutions provide enterprise-wide medication management across your entire health system to offer greater inventory control, enhanced workflow efficiency, and improved patient safety. As of 2013, Talyst has installed automated system in more than 700 integrated healthcare systems, acute care hospitals, long-term care facilities, and correctional institutions.

Product Overview

With increasing complexity across the 340B program as well as growing numbers of HRSA and manufacturer audits, it's critical to have the right solution. More than half of the top Health Care Systems utilize Talyst solutions such as our AutoSplit® Contract Pharmacy, and 340B Compliance Services.

Our AutoSplit Contract Pharmacy program allows Covered Entities to affordably capture additional 340B savings from hospital scripts dispensed at retail and specialty pharmacies. Talyst has a number of unique program features that focus on making the process as easy as possible for the Covered Entity and the pharmacy. Features include immediate auditing, compliance, and detailed reports showing the total scripts captured, total 340B savings and the total cost. In addition, Talyst offers 340B Compliance Services, which is an end-to-end managed service to ensure 340B compliance.

With Talyst's AutoSplit Fully Managed Solution, Talyst experts manage all facets of your 340B program. This allows health systems, IDNs, and their contract pharmacies to boost savings by having dedicated 340B experts run the program and ensure audit compliance.

Talyst's powerful AutoSplit® 340B software automatically monitors all pharmaceutical usage in 340B eligible healthcare organizations, optimizing returns on qualified transactions while maintaining compliance. AutoSplit's 3-way splitting is compliant with the recent HRSA policy. It works with multiple wholesalers simultaneously and has exportable reports to help maintain compliance. Talyst will assess and select 340B solutions and tools to help you develop a complete Audit Program that specifically addresses the following:

- 1) Patient Eligibility
- 2) Duplicate Discounts
- 3) GPO Exclusion
- 4) Contract Pharmacy Arrangements
- 5) Recertification
