### Company Background

Phil Lisitza, the company's president, CTO and founder, grew up working in his dad's small town pharmacy. In 1990, while upgrading to a new pharmacy system Phil's dad was shocked he would have to move his data manually and implored his son, a computer geek at heart, to help. Phil, then a chemistry student at University of Illinois, developed what would become the first pharmacy data conversion. When the new vendor asked if he wanted to do it again an industry was born. Since then, Two Point has been steadfastly dedicated to solving even the most complex pharmacy data challenges.

Two Point has worked with nearly every top 50 drug chain, independent vendor, and hospital system over the past 26 years as the leading provider of data services for pharmacies, chains, medical centers, and hospitals. With an array of system knowledge in the hundreds, Two Point's core competency is the ability to get into any system and extract the data and images required to get the job done. Our employees are hard working, caring, and average over 10 years of service. A culture of collaboration and education allows the Two Point team to provide exceptional products and superior service to customers with integrity.

### Product Overview

ACERT™ allows independent pharmacies, retail chains, and hospitals with large datasets to have ready-access to seldom-used, closed, or acquired facility system data after the data migration process is complete. Reports and images can be produced on the fly in PDF form delivered to end users.

### Features & Options

#### ■ ACERT™ provides hospitals with:

- User-defined validation metrics and failure thresholds for migration.
- Hardware failover and optimization.
- Quick, intuitive web-based roll-out control for automated migration and daily backup for large scale migrations.
- Enterprise-wide and drill-down reporting in multi-location settings.
- Single location for housing multiple systems from the entire hospital organization.

#### ■ Three Reasons to Archive Data Using ACERT™

1. ACERT eliminates annual maintenance contracts, saving hospitals thousands of dollars with a single investment.
2. By mimicking legacy system interfaces, ACERT™ reduces users' learning curves.
3. Unlike HL7, ACERT™ supports images, doesn't have data field limitations, and is remarkably faster.

### Additional Product Modules

- Migration: ACERT™ allows for migration of thousands of stores or legacy systems.
- Archiving: ACERT™ can archive systems across the hospital to allow decommissioning of legacy systems from pharmacy, EMR, practice management, document management, accounts receivables, medication order systems, radiology, automatic dispensing cabinets, POS, etc.

### Key Business Partners

Two Point can extract data from any known pharmacy system and has more than 26 years of experience collaborating with the nation's premier pharmacy system vendors.

### Trade Shows/Meetings Attended

Visit Two Point at NACDS, HCP, HIMSS, and AHIMA.
