Company Background

TCGRx is a leading supplier of pharmacy automation. Our solutions can be scaled from simple packaging technology to enterprise-level perpetual inventory management. That means providing not just the tools to make your pharmacy more efficient, but also the thinking behind those tools. TCGRx provides design and consultation services for solution integration in all pharmacy markets.

Product Overview

AdherePacRx eliminates the need for cumbersome vials and complicated instructions by offering both multi-med and unit dose pouches, which contain all of a patient's medications for a given pass time. The pouches have a serrated edge and are easy to open; helping to ensure patients take their medications as directed. AdherePacRx offers clear packaging with easy-to-view pills and all necessary information printed directly on the pouch for staff, patients, and caretakers to verify the correct medication is being taken at the right time, by the right patient.

AdherePacRx contributes to your medication therapy management program that will improve overall patient outcomes by simplifying medication administration.

Features & Options

■ AdhereTrakRx

AdhereTrakRx™ is an automated medication dispensing system that guides patients to take the correct medications at the correct time. For every medication pass, AdhereTrakRx audibly alerts the patient and dispenses an AdherePacRx containing all of the needed prescriptions, as well as reminder bags for non-oral solids. AdhereTrakRx pre-cuts each AdherePacRx during the dispensing process, allowing simplicity in medication administration. Missed medications are instantly recognized and shared with the patient's caregiver or pharmacy staff via both text message and e-mail.

■ ATP-Rx

The Automated Tablet Packager (ATP-Rx™) is the industry-leading oral solid packager. Engineered to provide better performance and reliability, ATP-Rx facilitates both unit dose and multi-med AdherePacRx packaging with simple-to-use software. Working in tandem with the SmartTrayRx™, ATP-Rx is the only system on the market allowing 100% automation of all formulary medications. Additionally, we have designed the ATP-71™ which offers a small footprint and an easy-to-use universal tray in addition to 71 canisters. The ATP-71 is perfect for entry-level packaging and retail adherence programs.

Marketing

TCGRx wants to save you the headache of publicizing your new innovative, pouch-packaging technology. We strive to allow you the time to focus on implementing the best adherence program for your patients; therefore, TCGRx has built the tools for you to market AdherePacRx adherence packaging to your customers. We offer various levels of customization that allow you to brand our print and video pieces to your market.

Testimonial

"Top kudos has to be extended to the TCGRx customer support team who care about my pharmacy's issues and recognize our need for urgency. They always respond professionally – no matter the situation, and they understand the industry and its unique constraints. It's a good combination, making stressful situations in the fast-paced pharmacy life easier to deal with."
