Company Background

ARxIUM was formed in 2015 when Intelligent Hospital Systems, Inc. acquired AutoMed Technologies, Inc., creating the most integrated pharmacy solutions company in the industry. Both companies were recognized as leaders in pharmacy technology, offering numerous best-in-category products and software solutions. By integrating the two companies' products, resources, and expertise into a seamless offering, ARxIUM provides customers in all pharmacy environments the broadest range of pharmacy technology available, helping to improve patient safety and workflow efficiency, and lowering operating cost. With customers, distributors, and partners around the world, ARxIUM has a global presence with international headquarters in both Canada and the United States.

Product Overview

■ RIVA™

RIVA, a fully-automated IV compounding system, allows hospital pharmacies to compound aseptic preparations in a United States Pharmacopeia USP <797> compliant environment while outputting admixtures in either syringes or bags. The automation of repetitive and complex tasks reduces the incidence of errors and contamination.

RIVA can prepare both chemotherapeutic and non-chemotherapeutic doses.

Whether your main focus is to improve the safety of IV admixtures, improve the efficiency and effectiveness of pharmacy operations, or meet regulatory compliance, RIVA addresses your unique concerns and challenges.

Features & Options

■ Safety

RIVA enhances the care of patients and health of your pharmacy team by improving the safety and accuracy of IV admixture compounding. By using state-of-the-art safety features and practices, detailed electronic auditing, and integration to current hospital systems, RIVA ensures that hazardous and non-hazardous doses are accurate for pediatric, neonatal, and adult patients.

■ Efficiency and Effectiveness

RIVA will save your pharmacy money and allow you to redeploy work resources by integrating into your pharmacy, completing orders rapidly, reducing drug and consumable waste, and lowering the need for pre-filled admixtures.

■ Regulatory Compliance

RIVA is designed to meet USP <797>, NIOSH, OSHA, and other regulatory requirements. In addition, RIVA provides a complete electronic audit trail of all prepared doses.

Additional Product Lines

■ **OptiFill™:** Custom-designed for virtually any market, including mail order, central fill, government, specialty, corrections, hospitals, and more, OptiFill can manage every aspect of your physical fulfillment process, from host system hand off to order delivery. But more than that, it employs advanced validation and digital imaging processes that help ensure every patient receives the right medication, at the right time — every time. So whether you want to process 1,000 or 100,000 prescriptions per day, ARxIUM can design a custom high volume solution for you.

■ **RxWorks™ Pro:** RxWorks Pro software allows the health system pharmacy to implement a system of integrated tools to manage the business of the pharmacy and automate inventory functions. Whether the pharmacy uses a primary supplier or many suppliers, RxWorks Pro helps automate the purchasing, receiving, and invoicing processes to maintain accurate, real-time inventory and help buyers make informed, data-driven decisions.

■ **MedSelect™ Flex:** MedSelect Flex, the cornerstone of the ARxIUM automated dispensing cabinet (ADC) solution line, offers hospitals and long-term care pharmacy providers a modular and scalable solution that helps reduce medication errors, control costs, comply with regulatory agencies, and increase staff productivity. This is accomplished through multiple levels of security, best-in-class data storage, robust reporting capabilities, true unit dose dispensing, and single item access capabilities.

■ **FastPak™ Elite:** FastPak Elite, a versatile oral-solid medication pouch packaging system that provides modular configurations and limitless formulary capabilities. The system's utilization of smart canisters, which can be placed anywhere in the device, enables pharmacies to automate every aspect of oral-solid medication packaging. The dynamic bag sizing function selects correct pouch sizes based on the contents being packaged and results in significant savings on consumables. Innovative printing capabilities allow for the inclusion of graphics and specific dosing instructions for improved patient safety and compliance.
