Company Background

Fagron, Inc. provides pharmacists in the United States with high quality products and solutions. Fagron continuously introduces innovative products, based on research done in our own R&D center. We work together with our customers, universities, physicians, and other care providers to provide optimized compounding solutions. We continuously perform studies on our products, dedicated to providing you the best quality possible. Fagron supports customers by offering complimentary professional support. Our staff of experienced pharmacists and technicians provide technical assistance and answers to pharmaceutical & professional technical questions.

Fagron, Inc. is part of the Fagron Group, the global market leader in pharmaceutical compounding, and is headquartered in the Netherlands. Fagron is active in 30 countries and employs over 160 pharmacists worldwide.

Product Overview

Fagron Advanced Derma offers unique benefits based on the latest scientific knowledge in pharmaceutical compounding for dermatology.

- Used in formulating individualized treatment based on skin type.
- Designed for optimum patient comfort to improve the patient's quality of life and compliance.
- cGMP produced vehicles with high quality ingredients.
- Vehicles are tested to be stable and durable with a broad range of APIs and dermatological ingredients (DCIs) used in dermatology (compatibility table available on request).
- Providing efficient, time-saving compounding solutions.
- Worldwide availability without membership commitments.
- Based on the latest scientific developments in compounding and dermatology.
- Facilitates collaboration between health professionals to maximize therapeutic results.
- All vehicles are uniquely formulated to contain only ingredients with maximum skin-tolerance¹.
- Example formulations available for help with prescribing and compounding.
