Company Background

Eiger Creative LLC was founded in 2004 as a software development and consulting company. Its founder and employees have been involved in IT for over 30 years. Together they bring a rich variety of skills in the areas of retail, healthcare, pharmacy, marketing, accounting, and customer service. Throughout the many changes in the IT landscape, Eiger Creative has maintained a commitment of delivering best of breed solutions to its clients.

The DosePlanner family of products and services exemplify our commitment to bringing products to the pharmaceutical market that can truly help our clients grow their business.

Product Overview

It seems like all we hear about these days are the terms compliance, adherence, and synchronization. Compliance packaging helps you to achieve all three of these in one pass! Multi-med packaging can help ensure that the patient receives the correct medications and dosages at the correct times. But achieving this seemingly simple delivery system can be a real nightmare for the pharmacy if they do not have the proper tools to help package and track these medications.

The DosePlanner system of software products can help you easily manage your packaging tasks while helping your business grow! DosePlanner can prepare several packaging styles and is compatible with many of the most popular pharmacy management systems. At DosePlanner, we are constantly upgrading our systems to grow with you. You can begin your compliance packaging journey with the smallest start-up operation, or you can enter with an established operation looking for productivity improvements. Either way, DosePlanner is there to help make your job easy.

Product Specifications

With DosePlanner, you get:

- An easy-to-use design, providing a high level of confidence in packing accuracy.
- Support for a variety of packaging styles.

- The flexibility to create labeling on-demand.
- Integration with many popular pharmacy management software systems.
- Integration with Zewa™ Medication Compliance system.
- Reporting tools to help streamline business operations.
- A selection of reports to aid you and your customers.

DosePlanner software is cloud-based and can be accessed from any workstation in your pharmacy. No extra equipment to purchase! DosePlanner interfaces with many popular pharmacy management systems software packages, providing greater options and flexibility to meet your customer demand.

DosePlanner is dedicated to providing best-in-class technology, solution consulting, and hands-in support, ensuring our customers are equipped with the resources to advance pharmacy practice.

Testimonial

"We needed a compliance packaging solution with emphasis turning to adherence and compliance for a particular client and for our regular customers as well. I have turned to DosePlanner and have never looked back. The software is easy-to-use, integrates with most pharmacy platforms, and has saved us countless hours of time. DosePlanner is an important part of our growth strategy. Their customer support is extremely reliable, and they have the personnel with expertise to handle our technical needs. If there was an issue, I could call, email, or text Rick and the issue was resolved quickly. Our client has been very pleased with our solution to their needs, and our "walk in" customers are finding this a useful alternative to the pill boxes we have been using. I can't recommend the DosePlanner software enough."

— Chris Hampel R.Ph, Family Prescription Counter, Duryea, PA

Additional Product Modules

■ DosePlanner PMS Interface

PMS Interface is an optional module designed to increase pharmacy productivity by reducing the need for double entry of patient and prescription data. The interface automatically captures data from the pharmacy management software to keep the DosePlanner system synchronized.

■ DosePlanner Electronic Report Delivery

ERD is an optional component for DosePlanner that allows the pharmacy to generate and deliver reports to a secure cloud-based repository specifically designated for their client's access.
