### Company Background

MedCollect was created by Return Solutions, a 25-year veteran in the expired pharmaceutical product returns industry. It was created in response to the need for a turnkey, DEA-compliant process through which customers can dispose of items collected from the community.

### Product Overview

MedCollect provides easy, safe, and cost-effective solutions for pharmacies, law enforcement agencies, and other community organizations offering patient medication take-back services.

The collection kiosk and liner system make managing your patient take-back program simple and hassle-free. Choose from our four sizes of collection kiosks, ranging from six to 62-gallon capacity. The kiosk will be delivered to you, fully assembled, with a collection box and liner already in place.

If you already have a collection receptacle installed in your facility, you can still use the MedCollect liner system. We offer several sizes of liner packs that fit most standard collection receptacles.

The liner pack includes everything you need to remain fully compliant with DEA regulations and has a prepaid UPS shipping label affixed. When your box is full, simply remove it from your kiosk, follow the instructions for packaging, and give to a UPS driver. The box is shipped directly to the destruction facility and you can track it from pickup to destruction on our website. Additional liners can be ordered in single or value-packs from our website.

### Features & Options

■ **All MedCollect Collection Kiosks include the following features:**

- Brushed stainless steel weather-resistant material.
- Lockable delivery hopper with an anti-tamper protection system.
- Tilt and slide delivery operation for secure medication disposal.
- ADA compliant — offers one-hand delivery at ADA height.
- Fully customizable with optional powder-coating and graphics.

■ **MedCollect Liner Packs include:**

- Heavy duty, fully assembled cardboard shipping box.
- Two black plastic liners with identical serial numbers.
- Absorbent pads for top and bottom of liner.
- Zip ties for securely fastening liner when full.
- Full instructions for inserting and removing liner.
- Prepaid UPS shipping label for no-hassle shipment directly to destruction site.
