Company Background

Now more than ever, giving your customers a great experience when they visit your pharmacy, and even more so when they use the products you dispense, is critically important. GREAT CUSTOMER LOYALTY is built on the foundation of GREAT CUSTOMER EXPERIENCE. FLAVORx products give you the ability to “Wow!” your customers in so many ways. From giving children the choice of how their medicine tastes and providing customers with a better way to swallow tablets and capsules, to offering pet owners an alternative to pilling their pets, and filling antibiotic prescriptions quicker than ever, you can use the FLAVORx suite of products to significantly improve and grow your business.

Product Overview

The Fillmaster Plus is the fastest, easiest, and most accurate way to reconstitute and flavor liquid medications. When mom comes to the pharmacy to pick up her child’s antibiotic, you’ll fill the prescription in no time with the Fillmaster Plus. Integrated barcode scanning technology and automated water dispensing means reconstitution is completed with extreme accuracy in 20 seconds or less. That’s half the time it takes to reconstitute with manual dispensing devices. With the Fillmaster Plus, you not only save your customers time, you also free up time for your staff to do more, like custom flavor liquid medications to a child’s taste preference.

“The new Fillmaster Plus has increased the number of flavoring we perform on a daily basis by over 50%, simply because it makes it extremely easy to flavor medicines quickly and accurately. I can’t say enough good things about the Fillmaster Plus!”

— Barney’s Pharmacy, Augusta, GA

By integrating taste customization into the workflow of dispensing medications, you’re more likely to offer this important service to your customers. Tailoring the taste of pediatric medications to a flavor kids like leaves a powerful impression on your customers. This drives up loyalty and leads to great word-of-mouth. Since children are more likely to take a medication that tastes like their favorite flavor, the flavoring service is also proven to boost pediatric medication compliance. Now, with the Fillmaster

Plus, flavoring is a breeze for your team. You can reconstitute and flavor a medication in less than a minute, so you won’t hesitate to offer this valuable service with every liquid prescription.

“The Fillmaster Plus makes reconstitution and flavoring much easier and more accurate. We don’t hesitate to offer flavoring now because it’s so much faster. It has even helped us bring in new customers.”

— Foster Drug, Mocksville, NC

Most pharmacies charge for the flavoring service, which means you can generate a quick return on your investment with the Fillmaster Plus. Saving your customers time and improving their experience both in your pharmacy and at home is priceless.
