Company Background

Innovation is the leading provider of pharmacy automation and Pharmacy Intelligence™ to the retail, hospital, government, and mail order pharmacy markets. Our PharmASSIST® suite of pharmacy automation and process optimization solutions enable all types of pharmacies to increase operational efficiency, enhance patient safety, and provide a higher quality of patient care. With Pharmacy Intelligence, we analyze your data, simulate your workflow and proposed automation, map out an attainable growth path, and optimize your entire operation. We help you develop a proven ROI that validates your technology decision before investing.

Product Overview

Your organization may have one or more outpatient pharmacies serving your communities and employee prescription benefit program. Our breadth of technology and professional services offerings provide a holistic platform that addresses your complete healthcare network’s prescription fulfillment activities. We deploy “right-sized” workflow management and dispensing technologies at the outpatient pharmacy level, and deliver our next-generation PharmASSIST High Volume Solutions for central fill/mail order environments.

PharmASSIST High Volume Solutions are a completely integrated and configurable collection of high-volume robotic dispensing, workflow and operations management, conveying, collation, and packaging technologies. Whether your central fill/mail order aims to fill several hundred or several thousand prescriptions a day, our scalable solutions address the entire range of prescription volumes, physical space, staffing, workflow, and other pharmacy-specific requirements.

- **Reduces Costs Across the Board**
  - Achieves measurable labor savings and decreases Rx processing costs.
  - Encompasses a small physical footprint with a high throughput-to-space ratio.
  - Provides a definitive financial return on investment through compelling data and quantifiable results in a defined time period.

- **Advances Patient Safety**
  - Delivers unmatched dispensing accuracy with our PharmASSIST dispenser.
  - Provides barcode-driven quality checkpoints throughout your entire pharmacy workflow.
  - Prevents dispensing of expired medications by tracking all lot codes and expiration dates.

- **Enables Complete Transparency and Total Process Control**
  - Tracks virtually every event and provides customer-specific dashboards that display real-time status throughout your high-volume environment.
  - Delivers full visibility into your daily activity, helping you tightly manage and optimize your formulary, workflow, staff, and automation.

- **Delivers Unmatched Versatility**
  - Offers the complete range of order transport (vials, totes, and pucks), dispensing (robotic, cabinet-based, scale-based), collation, packaging, and workflow and operations management technology tailored to your specific requirements.

- **Provides Technology Growth Path**
  - Facilitates a clear path for expansion by building on your initial technology investment regardless of your ever-growing Rx volumes and enterprise complexity.

Additional Product Lines

- PharmASSIST pharmacy automation solutions — PharmASSIST Symphony® workflow and operations management system, PharmASSIST SmartCabinet® counting technology, PharmASSIST ROBOTx® robotic dispensing, PharmASSIST RxCollect™ robotic collation system, and PharmASSIST Light-Way™ storage and retrieval technology.
- Unit-of-use automation and tabletop counting technologies.
- Professional Services — wide range of services to help pharmacies optimize their pharmacy operations related processes.
