Company Background

Cactus® and the Smart Sink® system was created in early 2010 by its founder and CEO, Dave Maness. In an effort to reduce opportunities for illegal drug diversion, he developed an environmentally-friendly, easy-to-use narcotic disposal system for hospitals. Located in Charleston, South Carolina, Cactus® is nationally recognized as the most effective “Go Green” solution for medication waste. Now deployed in all 50 States, Cactus® is the industry standard for secured medication disposal in medical facilities.

Cactus® ... “Making a Difference in Healthcare.”

Product Overview

The Cactus® Smart Sink® system safely and securely renders remaining portions of controlled substances unusable and non-recoverable. It is wall or countertop mounted, includes a locking system, security alerts and alarms, and can be conveniently located anywhere medications are administered to patients. This state-of-the-art wasting system utilizes replaceable deactivation cartridges which are constantly monitored for capacity and expiration.

PharmaLock® is a secured compact liquid medication waste system designed for anesthesia carts or remote areas such as special procedures and operating rooms which require liquid drug disposal. The Smart Sink® and PharmaLock® technologies protect the environment, keep unused drugs out of red sharps bins, and help reduce opportunity for illegal drug diversion in medical facilities.

Typical Hospital Locations/Applications

Nursing Stations, Med Rooms, Near Medication Dispensing Systems, O.R., E.R., Cath Labs, Special Procedures, Surgery Centers, Radiology, Portable Carts, Anesthesia, Hospital Pharmacies, ICU, CCU, Oncology, or anywhere medications are administered to patients.

Key Benefits

- Forces proper “witness and waste” protocol.
- Securely renders unused narcotics unusable and non-recoverable.
- Keeps drugs out of red sharps containers and trash bins.

- Saves nursing time.
- Protects the environment.
- Quick and easy to install.
- Meets regulatory agency requirements for safe and secure drug disposal.

Product Specifications

- Countertop or wall mounted.
- Accepts liquids, tablets, and patches.
- Smart Sink Dimensions: 15 ½" wide by 12 ½" tall by 9 ½" deep.
- PharmaLock: Compact design for Operating Room applications (cart-based, wall or countertop mounted).
- Smart Sink: Requires one liquid and one solid cartridge.

Markets Served

- Hospitals
