## Company Background

For more than three decades, Yardi has been committed to the design, development, and support of innovative software solutions and services. The Yardi Senior Living Suite™ is the only fully integrated software solution built to improve every phase of senior living management by replacing disparate software programs with a single-stack software as a service platform for resident care, medication, finance, and operations.

## Product Overview

The Yardi eMAR™ solution, part of the Yardi Senior Living Suite, allows pharmacies to interact seamlessly in real-time with senior living providers to maximize care services. Replace paper MARs with a complete eMAR solution built into the industry-leading electronic health records platform (Yardi EHR™) and reduce risk and costs.

## Features & Options

Yardi eMAR provides online messaging tools designed to eliminate time-consuming fax transmissions and other common points of miscommunication. Users also save time by eliminating the need for month-end MAR reconciliation. Pharmacy staff and physicians can communicate immediately with med techs and nurses, and can be granted permission-controlled, secure and direct access to resident medication records.

Yardi eMAR also includes built-in features to mitigate risk, including an order manager for keeping track of orders for vitals, lab work, dietary requirements, medication and treatment directives, as well as an automated physician cycle review and verification.

## Interfaces

- QS/1
- FrameworkLTC
- Omnicare
- SuiteRx

## Additional Product Modules

Senior communities can use eMAR as a stand-alone solution or as an integrated module within the Yardi Senior Living Suite and take advantage of integrating your care units with other business units including finance and administration. Yardi Voyager® Senior Housing, Yardi EHR™, Yardi Senior CRM™, Yardi eMAR™, and RENTCafé® Senior Living™ are the best-of-breed foundation of a full business suite of products for senior living built on a single platform.

## Markets Served

- Assisted Living
- Independent Living
- Skilled Nursing
- Continuing Care Retirement
- Home Health
- Hospice

## Trade Shows/Meetings Attended

- SoftWriters' User Conference
- QS/1 Customer Conference
- ASCP
- Integra Users Conference
- ALFA/Argentum
