## Company Background

Founded in 2000 and based in the Tampa Bay Area of Florida, PharmaLink is the nation's premier Pharmaceutical Returns and Disposal provider. With services spanning the complete spectrum of the pharmaceutical supply chain, they have a 360° view of the needs of all businesses involved in the delivery of healthcare. The focal point of all services revolves around safely removing expired, damaged, and unwanted pharmaceuticals from the marketplace. Using a responsible, compliant, and innovative approach to pharmaceutical return and disposal services, PharmaLink is creating solutions for pharmacies and other supply chain partners, increasing value, and driving business profitability.

## Product Overview

The RxTakeBack® product line was developed in response to the requirements set forth in the Secure and Responsible Drug Disposal Act of 2010 and the growing need for U.S. consumers to have a compliant and logical outlet for all types of prescription disposal. RxTakeBack® is available to be purchased by entities registered to collect pharmaceuticals according to DEA regulation. These facilities include: retail pharmacies, certain hospitals, narcotic treatment programs, long-term care facilities (LTCF), and law enforcement.

RxTakeBack® provides its users with a turn-key solution, which includes: an ADA compliant collection kiosk, disposable kiosk liners, complete transportation logistics, and access to a web-based tracking and compliance system that assists users in conforming to DEA and EPA regulatory requirements.

The RxTakeBack® prescription disposal solution is currently available for sale to eligible facilities in the continental United States.
