scripClip™ by PerceptiMed

PerceptiMed's scripClip will call system uses technology which promotes patient safety and medication accuracy — freeing up time for patient care. scripClip reduces labor costs through faster bag searches and returns to stock, and reduces customer wait times.

Company Background

PerceptiMed was founded in early 2012 with a driving purpose — to reduce the margin of human error in prescription dispensing in retail pharmacies, long-term care facilities, and hospitals.

With improved prescription safety as a goal, Dr. Alan Jacobs assembled a team of machine vision experts, engineers, and pharmacists to develop his vision of an intelligent system that can visually verify and count pills for a patient's prescription. Ensuring the right prescription makes it into the hands of the right patient is also a priority. Our unique scripClip will call management system easily works within any pharmacy to quickly locate every prescription.

Thanks to PerceptiMed, patients can rest assured that the medication and dosage prescribed are in fact the medication and dosage they are receiving.

Product Overview

PerceptiMed's feature-rich scripClip™ Will Call System includes: verification checks that ensure customers receive their correct medications, provides labor saving search and RTS functions, locates all prescriptions belonging to a customer including family member prescriptions, and locates packages everywhere in the pharmacy. No store remodeling is necessary. It's the only system that supports both hanging bags and clips for paper bags. scripClip's ultra-efficient power management allows it to operate for over a year on a single, replaceable battery.

PerceptiMed's identRx™ uses artificial intelligence for machine-vision pill verification, and advanced technology verifies that every dose is correct as it simultaneously serves as an ultra-accurate pill counter. identRx performs automatic, multiple counts for all drugs including Schedule II drugs. Its small, desktop footprint eliminates the need for remodeling. identRx supports remote verification and can provide workload rebalancing in telepharmacy environments.

Features & Options

PerceptiMed's scripClip will call system has 12 advanced features for improved workflow, efficiency, and safety:

1. Prescription Verification
2. Works Anywhere — Including Refrigerators and Secure Cabinets
3. Fits Anywhere — No Store Remodeling
4. Labor Saving Return-To-Stock
5. Convert Will Call Inventory Into Sales
6. Tamper Proof, Diversion Alerts
7. Central Fill Tote Support
8. Express Pick Up — Locate Directly from your Customer Phone App
9. Hanging Bag and Paper Bag Clip Versions
10. Just In Time Inventory — Identify Specific Medications in Will Call
11. Rapidly Identifies Medications Not Picked Up — Improves Medication Adherence
12. Home Delivery Support

When we look at the return on investment for our scripClip system, the two highest values for a pharmacy owner are: one, rapidly locating hanging bag inventory in will call, at any time, for any date range and converting will call inventory to sales; and two, eliminating mishandled prescriptions at the POS, reducing HIPAA violations, and accurately locating all filled prescriptions for your customers — promoting better customer service and enhancing the customer experience. These two factors alone will turn your scripClip system into a revenue vehicle for your pharmacy.

Product Specifications

scripClip will call systems can be ordered to match any size pharmacy operation. Please call (650) 941-7000, option #1, to speak with a pharmacy consultant.

Trade Shows/Meetings Attended

PerceptiMed exhibited scripClip at the following events in 2017: NACDS Total Show Expo, APhA, NCPA Annual Convention, PDS, AmerisourceBergen, Cardinal Health, ComputerRx, and ASAP.
