Company Background

TCGRx is an industry leader in automation and design services for retail, hospital, long-term care, and specialty pharmacy markets. Backed by decades of experience, TCGRx utilizes the latest in technology to offer the most reliable pharmacy automation solutions on the market. Our staff designs and integrates automation and workflow solutions into every aspect of pharmacy dispensing.

Product Overview

■ SmartCardRx™

TCGRx is excited to offer the first multi-med blister adherence system to utilize light-guided and barcode-driven technology to make blister card filling more efficient. SmartCardRx™ enables the pharmacist to fill up to four cards per patient, or four patients per tray, using a unique barcode system and patented fill-to-light technology for improved productivity, accuracy, and safety. SmartCardRx works with a wide range of multi-med card formats to simplify medication management for patients with multiple prescriptions. Multi-med cards help patients improve adherence, leading to improved health outcomes. The patient card is printed with patient information and a full medication index. In addition, the patient blister card can be custom printed with pharmacy branding.

Blister Filling & Adherence

Blister Cards have been available to patients for over 40 years. TCGRx has added a wide array of blister cards in unit dose, 7-day, 28-day, 30-day, 31-day, and even control cards. Medication cards are economical and convenient for packaging medications to meet adherence program needs. The TCGRx difference is customization. We provide our customers the tools to customize patient labels to match pharmacy branding initiatives, while keeping costs low. By using print-on-demand products, if any information changes, you are able to respond, change, and print without having a large quantity of unused product on hand.

Pouch Packaging Adherence

AdherePac™ pouches, produced by the ATP® 2 are ideal for promoting at-home adherence, aged independent living, patients with complex medication regimens, or patients that are on five plus medications per day. AdherePacs can be customized with logos, icons, dosage, strength, and much more. A full medication report can be produced by the ATP 2 to accommodate the patient roll with a complete overview of a patient's medications for caregivers or physicians. With refills every 28-, 30-, or 31-days, this helps to ensure that patients are more likely to adhere to their medications as prescribed, refilling their scripts on time, every time.

Markets Served

- Independent Retail
- Retail Chain
- Long-Term Care
- Hospital
- Central Fill
- Specialty
- Nutraceuticals
