### Company Background

Hardy Diagnostics has been in business for 35 years. Jay Hardy, a Clinical Laboratory Scientist, founded the company in the Central Coast of California in 1980. We are committed to producing and distributing the finest products for the detection of microorganisms, as we partner with our laboratory customers to diagnose and prevent disease.

### Product Overview

Hardy Diagnostics offers many quality products to help with your compliance program and in-house testing. Our HardyVal Aseptic Media Fill Challenge Test Kits and “a la carte” components make USP <797> compliance easy. Choose from our Media Fill Test Kits or design your own challenge to simulate your compounding processes. We are also the exclusive USA Distributors for Trio Bas, the next generation of microbial active impact air samplers. Trio Bas is made in Milan, Italy by the original engineers of the first portable air samplers, designed over 35 years ago. Trio Bas offers a model to best fit your cleanroom environment, can sample 1,000 liters of air in five minutes\*, and the instruments use standard agar plates. Look to us for plated media for all your environmental sampling procedures. Remember: Quality matters! Quality culture media goes hand-in-hand with patient safety, care, and viability of your business.

\* With the 200 liter per minute model.

### Unique Features of Trio Bas Microbial Air Samplers

1. Taking the optimum features from their former design, the Trio Bas Instruments boast improved ergonomics and technology. Trio Bas Instruments are lightweight, have a balanced design, and have “safe” Bluetooth data transfer ability for data integrity.
2. Trio Bas Instruments are easy-to-use and hold either standard petri or contact plates; they are an economical and stress free sampling solution. You can count on Hardy for great prices on readily available culture media!
3. Trio Bas Instruments are well suited for ISO classified environments. They have an antibacterial coating and are IP65 rated for dust and water resistance. Additionally, with no outer plugs or openings (they charge by “resting” on a Base Station Induction Charger), they can be easily disinfected, thus further minimizing contamination concerns.

### Markets Served

- Compounding Pharmacies
- Hospital Compounding Pharmacies
- Cleanrooms
- ISO Classified Areas

### Trade Shows/Meetings Attended

- IACP
- ASHP
- NHIA
- APIC

### Ordering Information

To learn more about how Hardy Diagnostics can help mitigate the risk of microbial contamination of your CSP's, please contact us at (800) 266-2222. See us online at [www.hardydiagnostics.com](http://www.hardydiagnostics.com) and [www.hardyvalkits.com](http://www.hardyvalkits.com).
