Company Background

KnowMyC2 was founded to help improve the efficiency of the retail pharmacy by helping to manage their Schedule II Controlled Substance Inventory. After working in retail pharmacy for 20 years and seeing pharmacies still operating their controlled substance logging out of a paper binder, something had to change. We created a software that offers security, accountability, and cloud-based logging to save time, money, and diversion prevention.

Product Overview

A well run pharmacy will keep a log of its Schedule II Controlled Substance Dispensing History so that the exact count of all CII drugs on their shelves are accounted for. This is usually done with some sort of log, either paper binder or excel spreadsheet. Some pharmacies do this voluntarily and for others it is required by state pharmacy law. The purpose of this log is so the pharmacist knows their controlled drug count 100% of the time. Keeping this log in a paper binder or excel spreadsheet can be time consuming and cumbersome, not to mention lack security. KnowMyC2 is a cloud-based website that houses this controlled substance inventory in real-time and logs transactions in as little as five seconds. No costly interface is needed and it can be operated from any computer. This software will also greatly assist in the event of State Board or DEA audits that are becoming more prevalent everyday.

KnowMyC2.com Features

- Track your Schedule II Controlled Substance Drug Inventory in real-time.
- Add an additional layer of protection from drug diversion inside the pharmacy.
- Log all transactions using a secure pin, much faster to use than a paper log.

- Eliminate paper binders, excel files, and notebooks.
- Monitor all changes made on your CII Log.
- Keep your data safe and secure in the cloud.
- Log and monitor incoming and outgoing items, update item status, and more!
- Unique reporting feature that puts important information at your fingertips and assists during State Board or DEA audits.

Product Specifications

- Cloud-based secure website.
- Work from any computer or internet browser.

Testimonial

"KnowMyC2 is straightforward, easy-to-use, and eases the stress of keeping track of controlled substance inventory."

— Tamara Draper, Payson Rx Express
