Company Background

Three decades ago, a physician encountered a patient who required an anti-nausea medication that was no longer commercially available. The physician challenged a Houston area pharmacist to compound the medication. The prescription was a success, and the pharmacist saw that others in his field faced similar demands to help patients who required compounded medications. This network of pharmacists, united by a commitment to meet patient needs, was the foundation of PCCA (Professional Compounding Centers of America).

Today, PCCA has become the independent compounding pharmacist's complete resource for fine chemicals, equipment, devices, flavors, ACPE-accredited training and education, pharmacy software, marketing, business and pharmacy consulting assistance. Our membership includes more than 3,900 independent community pharmacists in the United States, Canada, Australia, and other countries around the world.

Product Overview

PCCA Membership

You became a pharmacist to help those in your community. With Professional Compounding Centers of America (PCCA) backing you up every step of the way, pharmaceutical compounding will offer you an opportunity to make your practice both successful and rewarding. As a member of PCCA, you'll have access to the best, highest quality products and services in the industry, bar none. All supported by the most dedicated team in the industry.

Highest Quality Products

With PCCA, you can rest assured that you and your patients are getting the highest quality possible. While others go for the low cost option as "good enough," PCCA is dedicated to delivering

the highest quality actives and non-actives. From the moment any one of the 4,500 chemicals we stock arrives at our facility to the time it ships to you, it's tested and verified a minimum of 14 times – a process performed on every lot we receive, not just the initial shipment. Because of this dedication to you and your practice, PCCA rejects over 180 chemical lots a year.

Exclusive, Proven Bases and Formulas

As a member, you'll have access to more than 50 proprietary bases unavailable to other compounders. From VersaBase® topicals, specifically designed for BHRT delivery, to Lipoderm®, the industry's only transdermal proven to deliver four drugs simultaneously, you will differentiate yourself amongst your competitors and give your patients and practitioners the confidence to keep coming back to you. Members and consultants also have access to a database of more than 8,000 active proprietary formulas that have been pre-tested using PCCA chemicals and bases, and that are continuously reviewed and updated.

Comprehensive Education

Continuing education is the key to continued success in your practice. PCCA conducts more Accreditation Council for Pharmacy Education (ACPE)-accredited continuing education than anyone else. In 2012, PCCA will conduct more than 110 ACPE-accredited sessions across the United States, Canada and Australia, as well as scores of other training sessions from clinical and technician-related topics to sales and marketing. Check out www.pccarx.com/education for the latest training and educational offerings available.

Complete Support

With more than 30 pharmacists and pharmaceutical chemists on-hand, answers to your toughest compounding questions are closer than you think. PCCA has more pharmacy consultants on staff than any other competitor, answering more than 600 calls a day from members with an average response time of less than 30 minutes. Looking for sales and marketing support? We have that, too. From monthly calls with fellow owners and marketers to on-line and in-person training, we'll give you the support you need.

Testimonials
