Company Background

Based in Wake Forest, North Carolina, RxMedic Systems provides leading-edge dispensing technology to pharmacies. Each RxMedic product is strategically engineered to increase productivity and enhance patient safety while providing pharmacy staff more time for customer service.

RxMedic is a subsidiary of the J M Smith Corporation, a Spartanburg, SC-based corporation which also owns QS/1®, Smith Drug Company, Norgenix Pharmaceuticals, Smith Premier Services and Integral Solutions Group, all of which serve the pharmacy industry.

Product Overview

RxMedic manufactures automated counting and dispensing systems that work with pharmacy management systems to increase productivity and patient safety. RxMedic has a lower initial capital investment and lower lifetime operating costs than other counting and robotic systems.

RxMedic supports its customers with video conference, onsite and toll-free customer support, and a nationwide network of offices.

The RxMedic ACS™, Automated Counting System (ACS), is one of the cleanest, safest counting options on the market with separate cells and chutes to prevent cross-contamination. The ACS can automate simultaneous counting of multiple medications and pre-count minimum quantities for seven (7) to 71 drugs in a scalable design. The ACS also digitally captures vial content images.

The RxMedic ADS™, Automated Dispensing System (ADS), holds up to 256 oral solid medications. The ADS dispenses the appropriate sized vials, prints and applies labels, dispenses pills, captures vial content images and caps vials in seconds. The large collating area holds 200+ prescriptions for longer, hands-free use.

Features & Benefits

Whether you're looking for the power of robotics or the affordability of an automated pill counter, RxMedic has the perfect time-saving solution for you. Both systems provide retail pharmacy's only photo verification for automated dispensing. Both systems interface with any pharmacy management system and use state-of-the-art technology to help prevent cross-contamination.

Product Specifications

RxMedic ACS - The ACS can simultaneously count multiple medications and has several built-in patient safety features, including bar code scanning and photo verification. The counting machine comes in several scalable sizes and configurations to fit your specific needs and budget.

■ State-of-the-Art Automated Counting

- Intuitive touchscreen operator interface
- Countertop, endcap and free-standing models
- Customize with optional cells, chute lengths and add-on modules
- Lockable cells
- Photographs and stores digital images of vial contents
- Simultaneously counts multiple medications
- Pre-counts minimum quantities ready for dispensing
- Unique return-to-stock feature
- Separate cells and chutes prevent cross-contamination

RxMedic ADS - The only retail robotic dispensing system with photo verification. The RxMedic ADS packs high speed processing into a very small footprint. It's 256 cells enable you to fill as much as 80% of your daily processing, complete with digital photo verification, labeling and capping.

■ State-of-the-Art Robotics

- Fully-automated dispensing of up to 256 different oral solid medications
- Fast fill rate
- Low noise and no vibration
- Cap application
- Configurable 200+ vial collating area
- Removable, auto-calibrating cells
- Supports 4 different vial manufacturers
- HEPA filtration & Vacuum-based dispensing for unprecedented air quality
- Unique return to stock feature
