## Company Background

For more than three decades, Inmar has been a leading provider of technology-driven pharmacy solutions for hundreds of retailers, manufacturers, and health institutions. Serving more than 40,000 pharmacy locations and more than 300 manufacturers, Inmar processes more than 1.1 billion pharmacy claims and more than \$4 billion worth of returned/recalled pharmaceutical products each year.

## Product Overview

### Rx Returns

For more than 25 years, Inmar's healthcare returns solutions have helped clients drive increased efficiency and value retention, manage risk, and minimize the environmental impact of returns. We do it through on-site or off-site service options and state-of-the-art technology, enabling compliant processes and disposition.

### Pharmacy Financial Management

Inmar provides pharmacies and health systems of all sizes a comprehensive solution set that maximizes profitability and reduces costs. In addition, we help you improve business intelligence through comprehensive reporting and best-in-class analytics and benchmarking. Our solutions include: claim reconciliation, exception management and patented technology for managing pharmacy contracts, business intelligence, and audits.

### Pharmacy Logistics Management

Know the status and location of every dispensed medication — from pharmacy to point-of-use — and eliminate phone calls and missing medication investigations with MedEx, the most comprehensive pharmacy logistics management solution on the market. The platform grows with your needs and integrates with existing IT systems and delivery methods.

MedEx enhances compliance, efficiency, and safety of medications prepared and delivered from the pharmacy to the point-of-use. It provides real-time status of all medications delivered and visibility to when the medication was prepared, when it left the pharmacy, who received it, and where it is stored.

### Workplace Solutions

Inmar provides pharmacies and health systems multiple solutions to enhance the workplace environment and make operations easier and more compliant.

Our EXPIdentify solution allows you to identify returnable pharmaceutical products compliantly and efficiently and helps you maximize your return credits — whether the product is hazardous or requires unique handling due to expiration, damage, empty container, or is only returnable for credit directly to the manufacturer.

Inmar's customizable floor mat solutions are built to enhance worker comfort and safety with the latest technology and materials to ensure durability. Increase worker comfort, boost productivity, lessen absenteeism, and reduce injury risk.

We also offer pharmacy inventory services, provided by the leaders in hospital inventory counting and valuation.

## Markets Served

- Health Systems and Long-Term Care Facilities
- Retail Chains (National, Large, Medium, and Small)
