Company Background

Inspired by care, Omnicell is a leading provider of medication adherence solutions for healthcare systems and pharmacies. With Ateb's expanded software platform, including Time My Meds®, this shared portfolio supports the Omnicell mission of increasing patient access to medication adherence solutions to simplify management of chronic conditions, with the goal of improving outcomes in the value-based outcomes healthcare continuum.

Product Overview

Omnicell is uniquely positioned to offer its valued pharmacy partners an unprecedented suite of pharmacy-based patient care solutions to position them for long-term growth and sustainability. By combining the Omnicell portfolio of SureMed® medication adherence packaging and related automation with Ateb's innovative and measurable patient engagement solutions, Omnicell enables its partners to adopt new methods of delivering coordinated patient care while increasing script growth and improving adherence and overall patient health outcomes.

Within the Patient Management Access Portal (PMAP), pharmacies will be able to identify which patients need a specific intervention. Utilizing these critical sources of data, pharmacies can effectively and proactively help patients to drive healthier outcomes in an affordable manner.

As the industry's leading provider of pharmacy-based patient care solutions with over one million patients enrolled in its Time My Meds®, medication synchronization solution, Omnicell helps pharmacies better control their business and deliver maximized reimbursements, increased overall script growth, and reduced DIR Fees, while improving medication adherence.

Features & Benefits

- Increase medication adherence rates and PDC scores, resulting in better patient health outcomes.
- Drive revenue through monthly patient visits that allow for additional patient engagement opportunities, such as immunization, medication reviews, and chronic care management programs.
- Increase script growth while decreasing overall healthcare costs and streamlining pharmacy workflow.
- Reduce delivery frequency for pharmacies who deliver medications to patients' homes.

Additional patient engagement software solutions include: Immunizations, Pharmacy Line® Interactive Voice Response (IVR), Prescription Reminders, and Refill Notifications.

Multiple Medication Packaging Products

■ SureMed® by Omnicell multimed adherence blister cards are designed to improve patient adherence by clearly organizing multiple medications in an easy-to-follow format that provides instant visual reinforcement of what to take and when.

- Easy-to-understand, clearly marked day-of-the-week and time passes.
- Tamper-evident, easy-to-puncture backing shows if medications were taken properly.
- Booklet style provides ample real estate for branding and script label(s).

■ Omnicell's easy-to-use Guided Packing Software lets pharmacies provide adherence packaging services quickly and with very little investment. Guided Packing is a cloud-based software solution that increases the accuracy of hand packing and includes a consolidated label for SureMed multimed perforated cards to help pharmacies provide caregivers and patients an easy way to improve medication adherence and overall health.

- Guided interface provides a high level of confidence in packing accuracy.
- Integrates with pharmacy management systems.
- Consolidated label with patient information and medication dosing instructions.
- Utilizes the SureMed® Class B certified perforated cards.
- Ability to print pharmacy logo or coupon directly on the front of the card.

■ The Omnicell VBM 200F is the only automated pharmacy solution that efficiently and accurately fills and checks SureMed multiple medication blister cards. The VBM 200F ensures pharmacies have the competitive advantage to easily scale their business to improve adherence and patient outcomes today.

Increase Revenue. Decrease Expense. Free up pharmacy staff and reduce operating expenses.

- Throughput of 35-40 sealed and audited cards an hour.
- Small footprint with ergonomic design; fits through a standard doorway.
- Intuitive interface and ease of access for cleaning and maintenance.
- Does not require compressed air.

Accuracy You Can Trust. Unparalleled and proven vision technology to verify every medication for each individual blister before the card is filled.

- Identifies and certifies medication based on size, shape, and color.
- Manually added medications, including ½ tab and ¼ tabs, are added directly to the VBM and verified by the vision system prior to filling the card.
