## Company Background

Helmer Scientific is a manufacturer and worldwide distributor of medical-grade cold storage and processing laboratory equipment. We have over 35 years of experience in providing high-quality temperature controlled environments, with our products being used in over 100 countries throughout the world. Helmer originated in the blood bank market where precise temperature control is essential to the successful storage and transfusion of products. These same principles have been applied to the design and development of our pharmacy products.

## Product Overview

With the cost of pharmaceuticals on the rise, healthcare facilities must be efficient and effective when it comes to managing cold storage. Helmer pharmacy refrigerators and freezers provide superior temperature uniformity and reliability, advanced alarms and monitoring, and integrated access control to help your pharmacy reduce waste, shrink cost, and improve processes. Pharmacy refrigerators are available in undercounter, upright, and pass-thru models, while pharmacy freezers are available in undercounter and upright models. Don't wait until it's too late. Trust Helmer for the safe storage of your valuable drugs and vaccines.

## Testimonial

*"The tipping point was when our outpatient clinics started losing money. They came down pretty hard on us for losing inventory due to improper storage. Something that could have all been avoided with the proper equipment in the first place. At any rate, we finally got a second RX-grade refrigerator and a RX-grade freezer and are slowly converting all of our cold storage over to proper and safe RX-grade units."*

## Features

### ■ Superior Chamber Temperature Uniformity

Stable temperatures and quick recovery are achieved with a heavy-duty, forced-air refrigeration system. Temperature is maintained to  $\pm 1.5^{\circ}\text{C}$ .

### ■ Advanced Alarm Monitoring

i.Series® models feature the i.C3® User Interface which offers continuous temperature monitoring and control, access to multiple information logs, on-screen event acknowledgement for corrective actions, and downloading via a full-color touchscreen.

Horizon Series™ models include an integrated alarm monitor with visual and audible temperature alarms.

### ■ Access Control

Integrated door level access control increases confidence in the security of stored pharmaceuticals and vaccines while eliminating the need for 3rd-party locks. The open architecture design can be connected to existing storage dispensing systems creating an integrated solution.

### ■ Dry Storage Environment

Helmer has developed a refrigeration system that results in reduced humidity levels creating a drier storage environment, ideal for storing boxes and other containers.

### ■ Custom Storage Options

Roll out baskets, stainless steel drawers, and wire shelves can be configured to the ideal storage arrangement for each facility.
