Transaction Data Systems

## Company Background

For the past 41 years, TDS has been dedicated solely to the success of community pharmacy. Today, over half of all community pharmacies utilize our software for their prescription filling/management needs. With systems in all 50 states, ranging from Alaska to Hawaii and down to the Virgin Islands, TDS (Rx30/Computer-Rx) is the unquestioned leader in pharmacy management software. There's never been a better time to join the TDS (Rx30/ Computer-Rx) family!

## Product Overview

*Computer-Rx* is our Windows-based platform offering an easy-to-use interface and robust tools for pharmacy management, pharmacy point-of-sale, and centralized pharmacy management. The Computer-Rx platform is one-size-fits-all solution, easily scalable to fit the demands of any independent pharmacy. Computer-Rx solutions offer dynamic reporting tools and easy claim reconciliation. Inventory management is made easy with EDI ordering and receiving through seamless integrations with all major and dozens of regional wholesalers. Using Computer-Rx, patient care is taken to the next level with innovative clinical solutions available only to TDS pharmacies.

*Rx30* is our Linux-based software solution, providing a robust, easy-to-learn management platform, point-of-sale software, and central management solution. Rx30 solutions offer multiple applications available to pharmacies and their patients to make managing patient medication regimens easy and interactive. The Rx30 platform offers fully automated e-scripts, revenue opportunities through innovative clinical solutions, and 80+ integration partners. Whether your focus is an independent retail pharmacy, small retail chain pharmacy, nursing home, nursing home consulting, compounding, or IV processing, we have all the tools to make your job easier!

## Features & Options

*Total Pharmacy Solution* including robust pharmacy management software, integrated point-of-sale, centralized pharmacy management for multiple locations, mobile tools, patient applications, integrated communication tools, integrated clinical opportunities portal, and more.

*Enhanced Medication Services* is an exclusive part of the TDS family and services all Computer-Rx and Rx30 users' clinical needs. Our team of trained clinicians provides high-quality, clinical intervention outreach services to patients and providers in collaboration with pharmacies and health plans. We work with patients to ensure they take their medications and resolve medication-related problems. We engage providers in facilitating needed prescription updates and changes. Our interventions provide "quality lift" for our partner pharmacies and health plans to achieve high-level performance on quality measures and improve health outcomes.

## Testimonials

*"The best recommendation that I could ever give Rx30 is that I have opened three new pharmacies since first coming on board with Rx30 and have chosen to stay with Rx30 each time. Rx30 sales, service, and commitment to keep moving their operations and programs forward makes it the best value that I can find in the pharmacy software arena."*

— Steven P., Independent Pharmacist and Rx30 User

*"I have used 20 plus software systems: chain, hospital, community, and independent retail settings. By far Computer-Rx has been the absolute best. Its been the most user friendly, its helped us monetize the business, the support staff has been amazing, and the company, as a whole, were in line as far as our beliefs of what this should look like."*

— Leo F., Clinical Pharmacist and Computer-Rx User
