Company Background

Talyst is a market leader in pharmacy automation and your partner in pharmacy operations. Our solutions provide enterprise-wide medication management across your entire health system to offer greater inventory control, enhanced workflow efficiency, and improved patient safety. As of 2013, Talyst has installed automated system in more than 700 integrated healthcare systems, acute care hospitals, long-term care facilities, and correctional institutions.

Product Overview

With increasing complexity and number of audits, it's critical to have the right solution. Talyst offers a variety of 340B solutions, including AutoSplit® 340B software, AutoSplit® Fully-Managed, AutoSplit® Contract Pharmacy, and 340B Compliance Services.

Talyst is the leader in 340B splitting software with more customers than any other organization. Talyst's powerful AutoSplit® 340B software automatically monitors all pharmaceutical usage in 340B eligible healthcare organizations, optimizing returns on qualified transactions while maintaining compliance. The automated system provides full audit trails for all eligible 340B dispenses and splits. AutoSplit is flexible, easy to implement, and can maximize 340B savings while reducing program administration hours. It works with multiple wholesalers simultaneously and has exportable reports to help maintain compliance. AutoSplit's 3-way splitting is compliant with the recent HRSA policy.

With Talyst's AutoSplit Fully Managed Solution, Talyst experts manage all facets of your 340B program. This allows health systems, IDNs, and their contract pharmacies to boost savings by having dedicated 340B experts run the program and ensure audit compliance.

Our AutoSplit Contract Pharmacy program allows covered entities to capture additional 340B savings from hospital scripts dispensed at retail pharmacies. Features include immediate auditing and reporting and detailed reports showing the total scripts captured, total 340B savings and the total cost.

In addition, Talyst offers 340B Compliance Services, which is an end-to-end managed service to ensure 340B compliance. Talyst will assess and select 340B solutions and tools to help you develop a complete Audit Program that specifically addresses the following:

- 1) Patient Eligibility
- 2) Duplicate Discounts
- 3) GPO Exclusion
- 4) Contract Pharmacy Arrangements
- 5) Recertification
