Company Background

MEDISCA Network was founded to provide the industry of pharmaceutical care with an unparalleled quality of service that will meet the day-to-day operational needs of compounding pharmacists all across North American, Australian, and other international markets. We have assembled a team of practicing compounding pharmacists, formulation chemists, technical support service representatives, lab technicians, and highly skilled experts in the pharmacy compounding field, who are dedicated to developing and maintaining an effective and responsive support system. Our vision is to raise the standards of pharmacy practice by offering quality Technical Support Services such as an Online Formula Database, Standard Operating Procedures (SOPs), Consultation Services, and a Customer Service Helpline.

Service Overview

MEDISCA Network is proud to offer world-class services that will allow you to fulfill all of your pharmacy's operational needs, by connecting you with one of our experts. MEDISCA Network's consultants are top specialists in regulatory compliance, facility design, workflow management, and business optimization.

Features & Options

MEDISCA Network's Specialized Consultation Services were designed to ensure a successful and seamless transition towards USP compliance through step-by-step guidance from our experts. These services are available remotely by telephone and email or directly at your pharmacy.

Benefit from our most popular feature, the USP <800> GAP analysis checklist, which contains but is not limited to:

- Facility and Hazardous Compounding Room
- Venting, Storage, and Engineering Controls
- Compounding Operations
- Standard Operating Procedures
- Medical Surveillance

- Testing Requirements
- Hazard Communication Program
- Personal Protective Equipment
- Personnel Training Competency Assessment
- Quality Assurance and Quality Control
- Performance Improvement

Testimonial

"MEDISCA Network's expertise has been exceptional in providing the required guidance in successfully attaining compliance for LP3 Network's state-of-the-art Pharmacy Training Center. We are pleased to see that it meets and exceeds current compounding standards, including USP <800>."

— Vanessa A. Pinheiro
 Pharmacist, LP3 Network
