Company Background

With over 25 years of experience, MEDISCA has developed a solid reputation as an innovative and entrepreneurial company in the pharmaceutical compounding industry. MEDISCA is a leading FDA-registered supplier of quality pharmacy compounding products and offers excellent service to the North American, Australian, and other international markets. MEDISCA's commitment to quality has been recognized with ISO 9001:2015 and ISO 13485:2016 certifications from TUV. We are dedicated to providing our clients with the highest quality compounding products, such as active pharmaceutical ingredients (APIs), fine chemicals, bases, equipment and devices, capsules, oils, flavors, colors, and compounding kits. Through its global partners, LP3 Network and MEDISCA Network, MEDISCA provides all the resources compounding professionals need to succeed. To learn more, visit www.medisca.com.

Product Overview

MEDISCA introduces SAMIX, a new line of versatile and reliable compounding systems for efficient mixing, which provides innovation and continuous supply for the compounding industry. Engineered and manufactured in Europe, SAMIX Systems facilitate the preparations of superior formulations for compounders.

This new line distinguishes itself by its modernity and leading-edge technology. It provides compounding professionals with high-quality mixing machines that combine great performance and accuracy to address the evolving field of pharmaceutical compounding.

The portfolio includes:

- Efficient Mixing Machines
- Leak-Resistant Jars
- Mixing Blades (Including the Models that Now Provide an Additional Trituration Effect)
- Accessories
- Starter Packs

This remarkable line leads the way towards smart and efficient mixing to meet compounding pharmacists' needs.

Features & Benefits

■ SAMIX Machines

SAMIX Mixing Machines feature an automatic lifting function and high stirrer motor power that results in efficiency and precision that exceed industry standards.

■ No-Leak SAMIX Jars

The unique design of SAMIX Jars provides an evaporation and contamination-free mixing vessel that will not leak even with water, enabling a manufacturing process in an oxygen-reduced space. Afterwards, the SAMIX Jar can also be directly used as a vessel for dispensing. Thanks to its sliding bottom and dispenser opening, the user can extract the medication conveniently and hygienically.

■ SAMIX Mixing Blades

SAMIX Standard Mixing Blades have been designed especially for SAMIX Jars. Their form and function ensure optimum mixing. In addition, the contact surfaces between the mixing blades and inner wall create a highly effective trituration effect. The titanium nitride coating of the shafts minimizes wear and improves the removal of frictional heat.

■ Starter Packs

SAMIX Starter Packs were designed to quickly and conveniently introduce this new product line into your compounding business.

Technical Assistance

MEDISCA is the exclusive distributor for SAMIX in North America with a U.S.-based service center for technical assistance.

Ordering Information
