Company Background

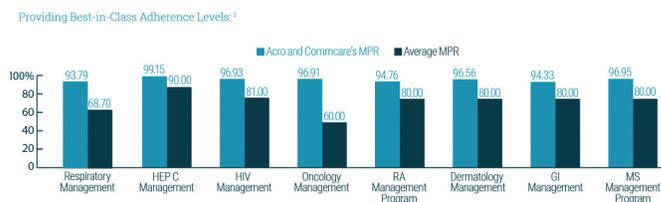

Premier originated as a shared services organization in 1969, but the Premier we are today was created by hospitals, for hospitals in 1996 through a merger of three companies. At that time, Premier had an idea to pool hospital buying power and clinical data in order to improve the healthcare system. Over the years, Premier has evolved with the healthcare industry to offer data and analytics, supply chain solutions, consulting, and other services that are driving healthcare providers to achieve cost and quality improvement across the industry. To advance these efforts by enabling greater investments in solutions that would bring value to our members, Premier became a public company in 2013. Today, Premier is a provider-led healthcare improvement company that unites an alliance of over 4,000 hospitals and more than 165,000 other providers to transform healthcare.

Product Overview

With a bird's eye view of what success in pharmacy looks like, Premier leverages the best of each area of pharmacy. We will help you implement a comprehensive view of providing superior patient care while saving money and improving revenue. Whether your pharmacy concerns are in retail or mail order, specialty or traditional, acute or non-acute, retrospective or predictive analytics, branded or generic products, Premier can help.
