Company Background

TCGRx is a leading supplier of pharmacy automation and pharmacy design services. Our solutions range from individual components to address specific issues, to complete pharmacy design. TCGRx has an experienced staff and we pride ourselves on delivering high-quality, reliable products that can be used, improved, and scaled for decades to come.

Product Overview

The ATP® 2 Automated Tablet Packager is the most versatile, industry-leading oral solid packager on the market. Engineered to provide improved performance, reliability, and flexibility, the ATP 2 is expandable for future growth or business needs from 64 to 480 medication canisters. When combined with AutoSense™ smart canister technology and ½ tab canister dispensing, the ATP 2 has a limitless formulary capacity. Equipped with a dual tray system, you can now continuously run your ATP 2 without interruptions, making adherence packaging practical for any pharmacy. The ATP 2 facilitates both unit dose in two sizes, short wide or narrow, and also has the ability to produce multi-medication pouches for outpatient adherence programs. Hospitals can include barcodes for meds-to-bed programs, ensuring patient safety with checks against e-MARs. The ATP 2 integrates with a comprehensive suite of pharmacy solutions offered by TCGRx, including a fully automated image verification system, the InspectRx® automated collation system, the BullsEye® automatic tablet splitter, high-density storage with HDStock™, and Beacon® Inventory Management System.

Testimonial

“With the Beacon/ATP solution, employee confidence in the accuracy of the dispensing process has soared, which means patient safety is optimized, while multiple users can also simultaneously contribute to workflow — a win/win for everyone.”

— Jeff Binkley, Director of Pharmacy at MRMC

Additional Product Lines

■ InspectRx®

InspectRx gives pharmacies the confidence of knowing their AdherePac™ pouches are accurate while increasing the throughput of the checking process. Pills are verified by identifying 12 physical characteristics and highlighting potential issues for pharmacists. Pharmacies can track erroneous pouches and missing meds back to the source with an archived database of the front and back image of each AdherePac scanned.

Markets Served

- Hospital — Inpatient
- Hospital — Outpatient
