Company Background

Holon was formed in 2010 as a division of SNAPS Solutions LLC. (www.snapssolutions.com) to focus solely on improving healthcare connectivity and workflow. Leveraging the configurable enterprise integration and workflow platforms developed by SNAPS and used in the commercial space for many years, Holon now offers Pharmacy Work Flow Manager and CollaborNet, our interoperability solution for healthcare communities.

Product Overview

Holon's Pharmacy Work Flow Manager supports the creation of virtual central order entry pharmacies to enhance your pharmacy team's efficiency and improve quality of care. Designed for hospital based pharmacies, Holon's Pharmacy Work Flow Manager integrates resources across your enterprise including remote/satellite pharmacies and central processing facilities while ensuring work load balancing and enforcing enterprise wide standards. Pharmacy Work Flow Manager can be easily configured to reflect your work processes. It enhances your existing Computerized Physician Order Entry (CPOE) and pharmacy management systems allowing you to schedule work by urgency, location, time of day, pharmacy specialty area etc. Pharmacists can organize their work; easily retrieve on-hold orders, last orders worked, orders to be worked and high priority orders. Pharmacists are empowered to perform “virtual” work on behalf of other pharmacists and pharmacies. Advanced reporting and dashboard views provide pharmacy managers with actionable information to measure activity to aid in performance improvement programs and to support rapid productivity improvement decisions.

Additional Product Lines

In addition to Pharmacy Work Flow Manager, Holon markets CollaborNet™, our healthcare information exchange solution that facilitates collaboration among healthcare providers by creating secure networks that manage the assembly, packaging, routing and delivery of vital health information. Holon's CollaborNet connects providers regardless of their level of technological sophistication, using the

systems in place and with or without standard communication protocols. CollaborNet is flexible and adaptable and can support changes to communication standards and methods as they develop. CollaborNet builds value from the bottom up by delivering information WHEN, WHERE and HOW you need it. At Holon we believe that collaboration improves lives.

Features & Options

■ Features

- Customized to your specific workflow requirements

Testimonials

“The Holon solution supports our mission of care by making sure the work is in the right place at the right time so nothing is delayed or missed. The new Pharmacy Work Flow Manager features include a dedicated workspace where pharmacists can secure and manage orders, easier annotation and improved filtering, all making our workflow more efficient and faster,” said Capps.
“Their commitment to delivery and quality is refreshing.”

— Richard Capps, Greenville Hospital System
 Pharmacy Manager, PharmD
