## Company History

In 1996, 20 Individual pharmacists purchased stock to provide the financial beginnings of *IJPC*. There was a need for a journal that would serve compounding pharmacists worldwide that would be both a “reference” journal and would also be a “referenced” journal – one that would be both used for research and for day-to-day practice. To date, *IJPC* has published six quality journals a year since 1997. When it comes to sterile compounding topics, there is no better source. *IJPC* has published more articles on USP <797> than any other publication in the world. *IJPC* began the CompoundingToday.com website which contains over 2,600 formulations, SOPs and other invaluable tools for compounding pharmacists.
