About Metro

Metro, a world leader in providing technology, storage and transport solutions for healthcare facilities, offers products for every department, including fixed point of care, mobile telehealth, automated dispensing, clinical documentation and specialized procedures. Designed to optimize workflow, maximize space and enhance productivity, Metro's expanding portfolio of healthcare products includes all Flo, Lionville and MedDispense products, offering a broad range of solutions that range from mobile computing workstations to medication management carts, shelving systems, cabinets and accessories. With a renewed focus on enhanced discovery, new technology integration and collaboration, Metro is able to respond more readily to the market's changing needs and provide a much broader portfolio of solutions for every facility. For more information on Metro and its diverse breadth of healthcare products, visit <http://www.metro.com>.

About Emerson

Emerson (NYSE: EMR), based in St. Louis, Missouri (USA), is a global leader in bringing technology and engineering together to provide innovative solutions for customers in industrial, commercial, and consumer markets through its network power, process management, industrial automation, climate technologies, and tools and storage businesses. Sales in fiscal 2010 were \$21 billion. For more information, visit <http://www.emerson.com>.

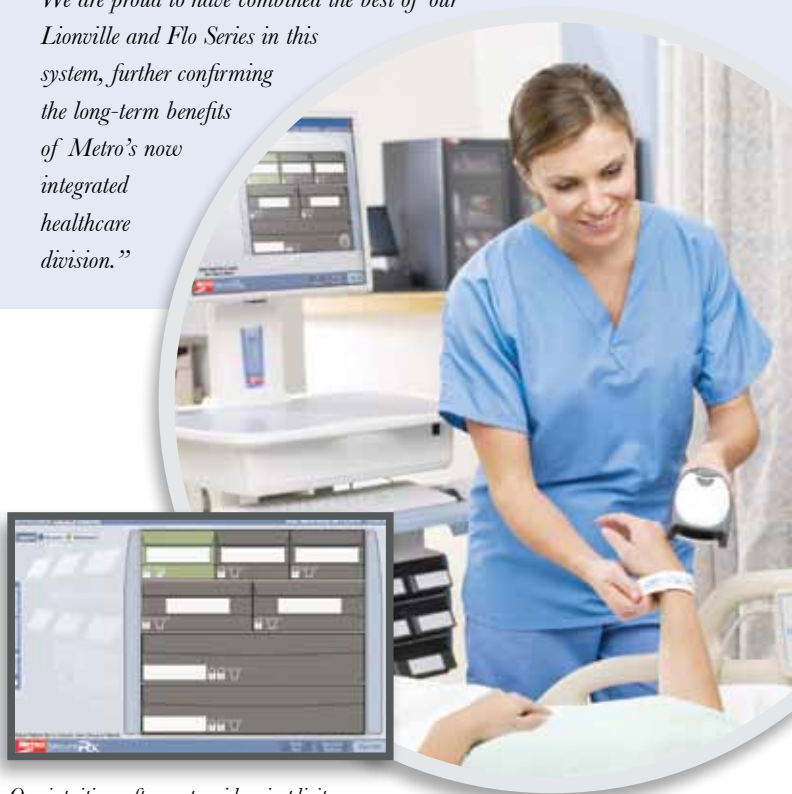

Product Overview

Metro's Hybrid Mobile Workstation with SecureRx™ Med Module is a highly mobile system that combines user-driven design with the power systems, storage and technology required to deliver medications to patients and to satisfy increasingly strict mandates. The system, designed to optimize nursing workflow, features:

- Real-time information with secure and accurate point-of-care medication delivery.
- Individually locking bins to simply secure and access medications for up to 12 patients.
- Multiple locking options and drawer configurations with secondary locking for controlled substances.

Testimonial

"The combination of the 1760 workstation with our new SecureRx Med Module was specifically designed to meet the unique needs of nurses in hospitals, clinics and nursing homes, as new mandates in medication delivery demand more of their time and attention," explained Rob Wolfe, product manager at Metro. "This system is a demonstration of our commitment to provide solutions that improve patient care at every turn. We are proud to have combined the best of our Lionville and Flo Series in this system, further confirming the long-term benefits of Metro's now integrated healthcare division."

Our intuitive software provides simplicity and effectiveness to promote the accurate, efficient distribution of patient medications.
