**VERACITY GROUP INC.**

## Company Profile

Veracity Group is an innovative company formed by the inventors of wireless temperature monitoring systems. Company principals installed the very first wireless monitoring system in a healthcare facility more than 10 years ago. From that time, they learned first-hand what pharmacies wanted and needed in wireless monitoring, and they saw the shortcomings, problems and failure rates of med refrigerators. The outgrowth of these insights is VersaTrak and VersaFridge — absolutely the best wireless monitoring system and most innovative med refrigerators available today.

## Product Overview

VersaTrak is a creation by the people who invented the very first wireless temperature monitoring system more than a decade ago. Since then, we've installed countless systems, and seen the problems with both temperature monitoring and refrigerator failures. In combining the capabilities of VersaTrak and VersaFridge, we've addressed key problem areas so that pharmacy directors can have the most accurate, easy-to-use, fail-safe wireless temperature monitoring and the most versatile refrigerator storage system.

### **Innovations in Wireless Monitoring Benefit Pharmacy Directors!**

Look at the innovative features available exclusively from the VersaTrak monitoring system:

- Unmatched wireless versatility — Supports WiFi & 900 MHz
- Backward compatible with many legacy systems (ask us about your system)
- All equipment is NIST-certified
- Most intuitive, versatile software solution on the market

### **Fully Integrated Transmitter**

For healthcare pharmacies, the fully integrated transmitter of the VersaTrak/ VersaFridge system is a huge advantage. Here's why:

- The transmitter is powered by the refrigerator's power source, not batteries
- Backup batteries last up to 15 years
- Transmitters are protected from damage in a recessed "niche" at top of refrigerator — No other refrigerator offers this protective feature!
- Integration results in virtual trouble-free operation for years

### **VersaFridge Eliminates Pharmacy Involvement in Fridge Failures!**

Innovative VersaFridge compressor/fan module can be changed out in less than a minute, so never a need to remove stored pharmacy items when a unit fails:

- 40% more usable space in same footprint than competitive models offer
- 100% front breathing & discharge; 100% front serviceable
- Saves energy — 75% more energy efficient than any competitive model
- Fully welded stainless steel construction, with 1-inch deep fully welded drip pan
- Interchangeable drawers & shelves

**VersaFridge — The Forever System:  
It's Infinitely Better!**

**Ask Us About Watch-Dog!**  
**Keeping an Eye on  
 All Peripheral Support  
 Systems!**
