

# Your Inventory Management Software Should Work for You

Introducing MedPortal™ Inventory Management Software—the first inventory management software product designed to make inventory management easy, so you can focus on the critical challenges of drug shortages and healthcare reform. MedPortal automates medication management, giving you access to accurate, actionable information—regardless of facility size, number of storage locations, or automation level.

Managing inventory shouldn't be a challenge. Take control of your inventory with a software solution that tracks medication movements from your wholesaler to your patients.

Contact Swisslog today for more information or to schedule a live demonstration.
