

Isolate compounded drugs
and improve inventory control.

Pass-Thru Refrigerators

i.Series® and Horizon Series™ Pass-Thru Refrigerators create a boundary between clean rooms and regular facility environments while permitting products to be removed outside the clean room on a “first-in-first-out” basis improving inventory control and boosting productivity. The design is smart and efficient, maintaining superior temperature uniformity and providing optimal alarm monitoring for the safe storage of high-value products. It’s the perfect blend of efficiency, reliability, and accuracy needed to meet productivity goals.
