

Freedom – Highest Quality Chemicals

Product Assurance Screening System (P.A.S.S.)

Product Assurance Screening System (P.A.S.S.) is a strategic step-by-step method for handling each product from receipt and quarantine, to final inspection and shipment. P.A.S.S. was created to ensure the integrity and safety of our chemicals. Every chemical is subjected to an extensive screening process to assure they meet the most current USP/NF/BP/EP/JP and/or other monographed specifications as well as application specific requirements.

At Freedom, we are committed to providing only the highest quality Active Pharmaceutical Ingredients (APIs), excipients and pre-made bases. We know that quality and consistency give our customers peace of mind, confidence, and a competitive advantage in their practice. To ensure the integrity of our chemicals, **every lot and batch** is rigorously screened to meet and exceed the most current requirements and specifications.

Knowledge. Support. Supply.
