

Every successful story starts with an easy read

Minimize complexity. Maximize safety.

You want barcodes that scan easily and reliably the first time. Our broad range of unit dose medications can help. They feature large barcodes for easy readability.

Plus, they:

- Use the Barcode Medication Administration (BCMA) system to verify the '5 rights' of medication administration
- Come ready to dispense
- Reduce medication errors
- Support positive patient outcomes

Curious how the AHP portfolio can support safe and efficient delivery of BCMA?
