

Less work for you, *and* safer for your patients?

Exactly!

Featuring
"FillSafe"
technology for
absolute
medication
security

Protect everyone at your pharmacy with Kirby Lester's new KL100, the only robot with "FillSafe" technology

The KL100 is the only 100-medication robot that combines the highest level of medication safety with the simplest operation. Your staff will thank you. And your patients will expect nothing less from you.

Featuring "FillSafe" For Dispensing Safety – The KL100 features the unique "FillSafe" technology, setting a new standard for security on robotic dispensers.

Perfect-Sized – The most compact 100-medication robot ever designed, less than 5' deep.

Workhorse – The KL100 is the extra set of hands you need. It handles about 50% or more of your total orders; in about 30 seconds, your filled, counted and labeled orders are ready to go. And upkeep takes only a few minutes per day.

Affordable – If you didn't think your pharmacy could afford robotics, look at the new KL100, and you'll rethink what's possible.

... And for all other medications, count *and* verify with the new KL1Plus

Combines counting *plus* streamlined scan-verification in one compact device. By handling all pills and unit-of-use items, the KL1Plus is the ideal partner to the KL100.
